

Now you can submit your annual immunization survey via your computer!

Introducing OSAS, the On-line School Assessment Survey, of the New York State Department of Health. This new system is faster, easier and allows you to submit your survey through an on-line, secure Internet site. You no longer need to fill in “bubbles” or be concerned about your survey getting lost in the mail.

Now all New York state schools can submit their mandated surveys through OSAS. It will eliminate paper survey errors, provide instant confirmation of receipt and automatically compile district immunization summary data. Training will be available right at your desk; no travel needed.

Extra Benefits

To submit your survey, you will be asked to visit the Department of Health’s secure Internet site (not available to the public) called the Health Provider Network (HPN). The HPN will allow you to submit your survey and get up-to-date information about important public health issues and alerts. Topics include: Emergency preparedness; influenza; pandemic flu; E. coli and salmonella; immunization, and disease outbreaks.

For more information about OSAS
