

New York State Immunization Information System (NYSIIS)

The New Statewide Immunization Registry

School nurses may gain access to NYSIIS to look up immunization histories for their students once they have obtained a Health Provider Network (HPN) account AND participated in a training session.

The training is an on-line recorded webinar, and can be accessed by going to: nysdoh.webex.com.

Once you reach that website:

- Click on the tab that says "Training Center"
- On the left-hand side of the screen look for a link that says "Recorded Sessions"
- Find the recorded session called NYSIIS School Access User Training

You can either view the webinar from the website, or you can download it to your own computer.

After you take the training, you will be added as a user to the NYSIIS application.

If you have any problems accessing the recorded webinar please feel free to contact Lori Isabella (see contact information at right) , and she can guide you through it.
